Bogor Regency 16913

I am a graduate of Politeknik Negeri Jakarta and CCIT FTUI with a major in Informatics Engineering with hands-on experience in full-stack development for web and mobile applications. Skilled in modern programming technologies, critical thinking, initiative, fast learner, problem solver, teamwork. With a strong interest in pursuing a career in IT with expertise in full-stack development, frontend and backend technologies, and mobile application development, I am ready to apply my knowledge and skills in professional projects and continuously develop my technical abilities in this dynamic industry.

EXPERIENCE

Web and Mobile Dev | Diskominfo kab. Bogor

Aug 2023 – Jul 2024

- Developed a web-based monitoring application used by 500+ users capable of automatically tracking the activity status of other applications owned by Diskominfo Kabupaten Bogor, utilizing the Laravel framework and Pusher WebSocket.
- Developed a mobile-based e-office application using Flutter framework for Diskominfo Kabupaten Bogor for 150+ employees, featuring attendance, task management, routines, and official agenda modules. The application consumes APIs from Golang backend.
- Designed prototypes to visualize the planned application project to be developed.
- Designed and structured the database architecture to ensure optimal data relationships and seamless integration across multiple systems.
- Participated in team collaboration to complete projects on time, delivering results that met targets and quality standards.
- Configured Microsoft servers for database storage and application deployment, ensuring smooth operation and robust performance in a production environment.
- Deploy the Mobile App to the Play Store.
- Conducted testing to evaluate application performance and verify alignment with user requirements.
- Performed data conversion of addresses into latitude and longitude coordinates.
- Added export and import Excel features to the Siaga112 application using Laravel framework.

Mobile Dev | PT Reendoo

Apr 2023 – Aug 2023

- Developed a mobile-based front-end point of sales (POS) application for restaurants using the React Native framework. The application consumes APIs from an existing backend.
- Designed prototypes to visualize the planned application project to be developed using Figma Design Tool.
- Participated in team collaboration to complete projects on time, delivering results that met targets and quality standards. Utilized Trello for project management tools.

- Conducted testing to evaluate application performance and verify alignment with user requirements.

IT Support | Zoom Computer

Ags 2016 – Nov 2016

- Installing intranet networks
- Setting up CCTV
- Installing operating systems
- Assembling personal computers
- Creating UTP cables

EDUCATION

Jakarta State Polytechnic | Teknik Informatika

2020-2024

Cumulative GPA: 3.67/4.00 (*Judicium Cumlaude*)

CEP CCIT FTUI | Software Engineering

2018-2020

Cumulative GPA: 3.49/4.00

PROJECT

Employee Management System | Diskanak Kab Bogor

Oct 2024 – Nov 2024

- Built from Next Js with Vuetify, integrating with Golang Gin-based backend APIs.
